Hours	-

Thanks to the long wheelbase design, the longitudinal stability of the whole truck is much improved, the hoisting capacity at the same lift height are enhanced by an average of 100kg. At the same time, it prolongs work life of the rear wheels due to the reduced rear axle load.

Unit 9 Longridge Court, Barrington Industrial Estate, Bedlington, NE22 7DQ

Increasing the proportion of rigid hydraulic pipes and utilizing right angle and straight through connectors reduces the pressure loss of the pipeline, in turn raising the lifting speed of the mast.

A 10% speed increase has been noted on average compared with the previous model.
